

Responsible Care Vastuu Huomisesta

## WE PLEDGE

In accordance with the Responsible Care - Vastuu Huomisesta initiative, continuously to improve our performance in all aspects of health, safety and environmental protection.

We will follow the Guiding Principles and Codes of Practice of Responsible Care - Vastuu Huomisesta in our operations, we will work in cooperation with other companies pledged to the programme, and we will share information about improvements in our performance to enable country-wide monitoring.

- 
- THE  
GUIDING  
PRINCIPLES**
- 1** We consider environmental, health and safety (EHS) issues, and minimizing problems associated with these, as an important and inseparable part of our business activities.
  - 2** We train, advise and encourage all our personnel to work in a responsible way in environmental, health and safety (EHS) matters.
  - 3** We continuously strive to minimize emission levels and improve the efficiency of our use of raw materials and energy.
  - 4** We continually assess our activities, to identify and reduce environmental, health and safety risks.
  - 5** We analyze wherever possible the environmental, health and safety impact of all new processes and products prior to their adoption or launch.
  - 6** We keep the authorities informed of our operations and their possible environmental, health and safety impact.
  - 7** We keep the public and other interest groups informed of our production operations and products, and their environmental, health and safety aspects; and we respond to anxiety and concern expressed about them.
  - 8** We provide our customers with advice on the safe use and disposal of our products.
  - 9** We expect our subcontractors and suppliers to follow these principles whenever possible.
  - 10** We inform partners involved in technology transfer projects of the appropriate measures required to protect the environment and ensure health and safety.
